It is literally true that no prescribed sum of dollars is sought during the sale of Canada Savings Bonds. The sale is held on the 15th. This sale was not prompted by a desire to fill up the Treasury's cash requirements. It is being launched to meet the keen desire of thousands of Canadians to join their program of regular savings inaugurated by the Victoria Foundation in 1945. It is a public relations campaign during the war years.

It might be described as the determination of the federal government to be responsible for the sale of bonds in all provinces of Canada that all citizens shall have an opportunity to buy bonds. That is why the story of the canvass of the new Canada Savings Bonds is not only told, and why investment dealers and banks are setting up facilities which will enable citizens to buy, no matter where they may be located.

On Books and Literature

After two wars and one revolution, the people of our Canadian patria, with one exception, have been too busy to read and to write. The present changes in the social structure of this country are the most important that have ever befallen the creative life. In Western Canada, the definite trend is toward the social sciences. It is evident that the present progress of the continent is at a critical juncture. The future is promising, and there is a growing appreciation of the need of the contemporary cultural forces of a new way of living.

The latest addition to regional history is a book called *The Prairie Frontier* by William L. Sturges, President of the University of Manitoba. This book is a study of the history of the prairie and the region of the Great Lakes and the Gulf of Mexico. It is a history of the prairie from the time of the first European settlement to the present. It is a history of the prairie from the time of the first European settlement to the present.
